

【左栏 • 英文原稿】

Hello everyone. Today I want to talk about healthy eating, especially for busy students.

Your body needs **protein**, **vitamins** and **minerals** every day. You can get **protein** from **eggs**, fish and **lean meat**.

Carbohydrates give you **energy**, so **rice**, bread and **cereals** are important, but do not eat too much **sugar**.

Too much **fat** and **salt** can lead to **heart disease** and high **blood** pressure.

Many students skip breakfast, which is a big mistake. A good breakfast helps your **brain** work better.

Drinking enough **water** is also essential, especially in **summer** when you lose **water** through sweat.

If you eat too much, you **may** become **overweight**, so watch your portion sizes.

Finally, do not forget to exercise. A short walk after dinner can help your **digestion** and keep you healthy.

Now let me answer some **health** questions. If you have a **headache**, **toothache**, **backache** or **stomachache**, you should see a **doctor** first.

A **physician** treats general **illness**, a **surgeon** performs an **operation**, and a **dentist** looks after your teeth.

For **children**, a **pediatrician** is the right choice, and a **veterinarian** treats **animals**.

Common problems include **pneumonia**, **diabetes**, **insomnia**, **asthma** and **tuberculosis**, and **congestion** makes it hard to breathe.

A **sprain** needs an **ice pack** and rest, and **walking sticks** help after an **operation**.

Medicine such as **antibiotics**, **penicillin** and **aspirin** is useful, but **sleeping pills** and **painkillers** must be taken with care.

The **dose** is important: an **overdose** is dangerous, so follow the instructions on the bottle.

In a clinic, you **may** visit the **ward** or the **maternity section**, and the **emergency** room deals with urgent cases.

Some people choose **acupuncture** as a **therapy**, and a **therapist** can suggest a **remedy** or a **cure** for your condition.

Remember that **milk** and **fruit** are good for you, and **regular** exercise keeps the heart strong.

Nutrition matters: **calcium** builds bones, and enough food prevents **malnutrition**, while too many calories make you **obese** or **overweight**.

Lack of sleep **may** affect your **intelligence** and **eyesight**, and some **children** have **learning difficulty**.

The **Medicine department** at the university trains physicians and surgeons for the future.

Let me end with daily **health** habits. An **injury** needs quick care, and **mental health** is as important as physical **health**.

【右栏 • 中文参考译文】

听力判断题 / 问答：

[T/F] **Protein** can be found in **eggs**, fish and **lean meat**.

[T/F] Skipping breakfast is a good idea for students.

[T/F] **Water** helps you lose sweat in **summer**.

[Q] What can too much **fat** and **salt** lead to?

[Q] What can help your **digestion** after dinner?

答案：

1.TRUE 2.FALSE 3.FALSE 4.heart disease 5.a short walk

大家好。今天我想谈谈健康饮食，特别是对忙碌的学生。

你的身体每天需要蛋白质、维生素和矿物质。你可以从鸡蛋、鱼和瘦肉中获取蛋白质。

碳水化合物给你能量，所以米饭、面包和谷物很重要，但不要吃太多糖。

过多的脂肪和盐会导致心脏病和高血压。

许多学生不吃早餐，这是一个大错误。好的早餐有助于你的大脑更好地工作。

喝足够的水也很重要，尤其是在夏天，你会通过出汗流失水分。

如果吃得太多，你可能会超重，所以要注意份量。

最后，别忘了锻炼。晚餐后短途散步有助于消化，让你保持健康。

现在让我回答一些健康问题。如果你头痛、牙痛、背痛或胃痛，应该先看医生。

内科医生治疗一般疾病，外科医生进行手术，牙医照顾你的牙齿。

对于儿童，儿科医生是正确的选择，兽医治疗动物。

常见问题包括肺炎、糖尿病、失眠、哮喘和肺结核，充血使人呼吸困难。

扭伤需要冰袋和休息，手术后拐杖有帮助。

抗生素、青霉素和阿司匹林等药物很有用，但安眠药和止痛药必须小心服用。

剂量很重要：过量是危险的，所以遵循瓶子上的说明。

在诊所里，你可能参观病房或产科，急诊室处理紧急情况。

有些人选择针灸作为疗法，治疗师可以为你的情况建议补救方法或治愈方法。

记住，牛奶和水果对你有益，规律运动让心脏强壮。

营养很重要：钙构建骨骼，充足的食物防止营养不良，而太多卡路里使你肥胖或超重。

缺乏睡眠可能影响你的智力和视力，有些孩子有学习困难。

大学的医学系为未来培养内科医生和外科医生。

让我用日常健康习惯结束。受伤需要快速护理，心理健康和身体健康一样重要。

家人和朋友的支持给你动力，积极的态度帮助恢复。

睡眠至关重要，规律的作息减少压力和焦虑。

过多的脂肪酸和胆固醇可能堵塞血管，千卡是食品标签上的能量单位。

体重不足的孩子需要更多食物，在本地诊所定期检查有助于预防问题。

手术后你需要休息和特殊饮食，医生会告诉你该吃什么。

空腹可能引起不适，助听器帮助听力不佳的人。
